

Youcef Ben Mohammed

BIOINFORMATICS ENGINEER | NGS DATA ANALYSIS |
PIPELINE DEVELOPMENT

✉ youcef.benmohammed@hotmail.com 📍 Massy, Île-de-France, France
🌐 youcef-benmohammed 📄 youcef-ben-mohammed 🌐 youcef-benmohammed.github.io

Profile

Bioinformatics engineer with experience in NGS data analysis and the development of reproducible pipelines (Snakemake). Strong programming skills (Python, R, Bash) and experience in interactive data visualisation (Shiny, Streamlit). Able to handle the entire data flow, from read quality control to biological interpretation, in a collaborative, research-oriented environment.

Experience

02/2025 – Present Gif-sur-Yvette	Bioinformatics Engineer (Ingénieur d'études) <i>Institute of Plant Sciences Paris-Saclay (IPS2)</i> • Development of RNA-seq analysis pipelines for short-read and long-read data. • Differential gene expression and alternative splicing analysis. • Organisation and storage of sequencing data. Tools and technologies: Python, R, Bash, Snakemake, Git, Slurm, STAR, rMATS, DESeq2.
01/2024 – 06/2024 Rennes	Bioinformatics Intern <i>INSERM Unit U1236 – Rennes University Hospital (CHU de Rennes)</i> Project: Development of a bulk RNA-seq deconvolution pipeline for Follicular Lymphoma • Construction of a reference scRNA-seq atlas from several datasets. • Literature review and selection of the most relevant deconvolution methods. • Implementation and benchmarking of the selected methods. Tools and technologies: R, Bash, Git, Slurm, Seurat v5, MuSiC, BayesPrism.

Skills

Programming languages Python, R, Bash/Shell scripting, SQL	Bioinformatics analysis FastQC, STAR aligner, Integrative Genomics Viewer (IGV), DESeq2, Seurat, rMATS
Development and deployment Git, Anaconda, Snakemake, Slurm, Docker	Visualisation and interfaces Streamlit, R Shiny, ggplot2, plotly
Development environments RStudio, Visual Studio Code, Jupyter Notebook	

Education

2024 Toulouse	Master's degree (MSc) in Bioinformatics <i>Université Toulouse III – Paul Sabatier</i> Track: Bioinformatics and Systems Biology
2022 Orléans	Bachelor's degree (BSc) in Life Sciences <i>Université d'Orléans</i> Track: Biotechnology, Molecular and Cellular Biology
